*Providing piece-of-mind
solutions since 1988*

Are intrusions by Hackers, Viruses, Worms, Denial of Service, and Trojans a concern?

Do you know that your network is scanned and attacked daily?

Can you detect both external and internal attacks?

Can you minimize the damage?

Can you tell when your employees engage in non-business activities?

Can you create a more productive work environment?

Act Now! Protect your company and your assets!

Expert Systems Resources inc., a leading supplier of security infrastructure, has shown many companies just like yours how to mount a quality defense against malicious intrusions. Our intrusion detection products and services allow hacker and virus activity to be detected and actions to be taken quickly to minimize and stop damages. Beyond traditional Intrusion Detection, *ESRIDS* permits tighter control on web-based e-mail and instant messaging.

Don't find out about an attack after your systems are damaged or about your employees' work habits after your company is adversely affected.

Protect your network and computer systems, and optimize your employees' productivity.
